MOBIUS DELIVERABLE

This report is a list of the delivered files under the framework of the MOBIUS Project.

- **MOBIUS-Firmware Folder:**
 - MOBIUS Firmware Release V1.zip: Contains the firmware to be downloaded to the WeAct STM32G031F6P6 development board.
- **MOBIUS-Schematics Folder:**
 - MOBIUS-Schematic.SchDoc: The schematic file for both the 700V and 800V variants of the UAVoPoS.
 - MOBIUS-PCB.PcbDoc: The PCB file for both the 700V and 800V variants of the UAVoPoS.
 - MOBIUS-BOM.xlsx: Contains the bill of materials required for the assembly of the PCBAs.
 - MOBIUS-GERBER-DRILL Folder: Contains the gerber files required for ordering new PCBs.
- **MOBIUS-REPORT_Manual Folder:**
 - MOBIUS-REPORT_MANUAL.pdf: The manual of the 700V and 800V devices delivered.
- **MOBIUS-GUI_Data_Logger Folder:**
 - dashboard.py: A GUI for data logging from the devices to a raspberry pi/PC via UART, created in python.
 - raw_test.py: A dummy code that plots the received data to a terminal. No GUI.
- **MOBIUS-Metal_Parts Folder:**
 - HV Bus Bar Folder: The metal busbars for the high voltage side of the Vicor modules.
 - LV Bus Bar folder : The metal busbars for the low voltage side of the Vicor modules.
 - QS8 Bracket A Folder: The first metal bracket for the interconnection of the QS8 connector to the PCB.
 - QS8 Bracket B Folder: The second metal bracket for the interconnection of the QS8 connector to the PCB.
